OBJECTIVE

As a new person in IT, my aim is to learn and work hard. I want to use what I studied and get hands-on experience in things like coding and solving problems. I'm excited to be part of a team, and I'm ready to pick up new skills on the job. I want to help with projects and be a useful part of the company while learning and growing in IT.

EDUCATION

- 2019-2023

- Anantha Lakshmi Institute of Technology Sciences**
B.Tech(E.C.E)
7.7
- 2017-2019

- Narayana Junior College**
Board of Intermediate Education
9.79
- 2017

- Z.P.H.School**
Board of Secondary Education
8.0

SKILLS

- HTML
- CSS
- SQL
- Core Java

PROJECTS

- Intelligent micro spy bot**
 - The tiny spy bots we're proposing are like mini cameras on a secret mission. They're super small, no bigger than a small finger, so they can sneak into tight spots and collect live video footage without anyone noticing.
 - Making these little spies is tricky because we have to shrink everything down and make sure they stay powered up, move quietly, and talk back to us without getting caught. We're also working on making them invisible and able to adapt to different places.
 - The idea is to use these tiny robots to keep an eye on things in places where it's hard for people to go, like tracking enemy activity or keeping an eye on terrorists. It's a cool idea, but we're still figuring out how to make it work just right.

ACHIEVEMENTS & AWARDS

- Java Full Stack certificate from Thopstech Institute

INTERESTS

- Learning new skill
- Riding bike

LANGUAGES

- Telugu
- English
